

WARNING SIGNS – FOR ANTI CLIMB PAINT AND ANTI VANDAL CLIMB BARRIERS.

When anti climb paint is applied it must be at least two metres above the height of the walkway so that members of the public cannot be accidentally come in contact with it. It is Northern Powergrid's duty of care to insist that clear warning signs are installed.

The signs will be Hi Visibility 150 x 200mm and manufactured from UV stabilised plastic material they will be mechanically fixed with anti – clutch screws direct to the wall or by using metal brackets for fencing these should be on each elevation at high level with a minimum spacing of 10m on walls and on non Statuary Regulation fencing.
