

Investing In York City Centre

Powering the region

At Northern Powergrid our teams work 24/7 to manage the electricity network that powers everyday life for our 8 million customers across 3.9 million homes and businesses in the North East, Yorkshire and northern Lincolnshire.

We understand the important role a safe, reliable power network has in supporting communities, local businesses and visitors. That's why we're investing to improve the quality and resilience of our network in York city centre.

As part of a wider programme of investments for the city, we're delivering a £300,000 investment programme to deliver four schemes of work designed to improve the reliability of the city's electricity supply. This focuses on replacing some High Voltage underground cables.

Overleaf you'll find an overview of these schemes which will entail some construction work in the city. We're working closely with City of York Council to ensure the works cause as little disruption as possible and we're committed to keeping local people informed. We're writing to those directly affected by the works and sharing information through local and social media.

We're not planning to turn anyone's power off as part of these works and it's unlikely we'll need access to premises. We'll also make sure we maintain pedestrian access to properties and that businesses can make arrangements to continue to receive their deliveries.

We'll be sharing more information about these, and further proposed investments for now and into 2020, in the months ahead. In the meantime, thank you for your patience while we carry out this important work to improve your local power network.

Yours

Mike H

Meet the team

Matt Bradshaw
Project Delivery Engineer

Matt will work with our contractors
to deliver the four schemes in York.

Jim Cummings
Design Team Manager

Jim's team is responsible for designing
the schemes that will improve reliability
and get the lights back on faster for you.

Lynne Papadimitriou
Customer Care
Operations Manager

Lynne and her team are committed to
responding to your enquiries about the
work we are doing in York city centre.

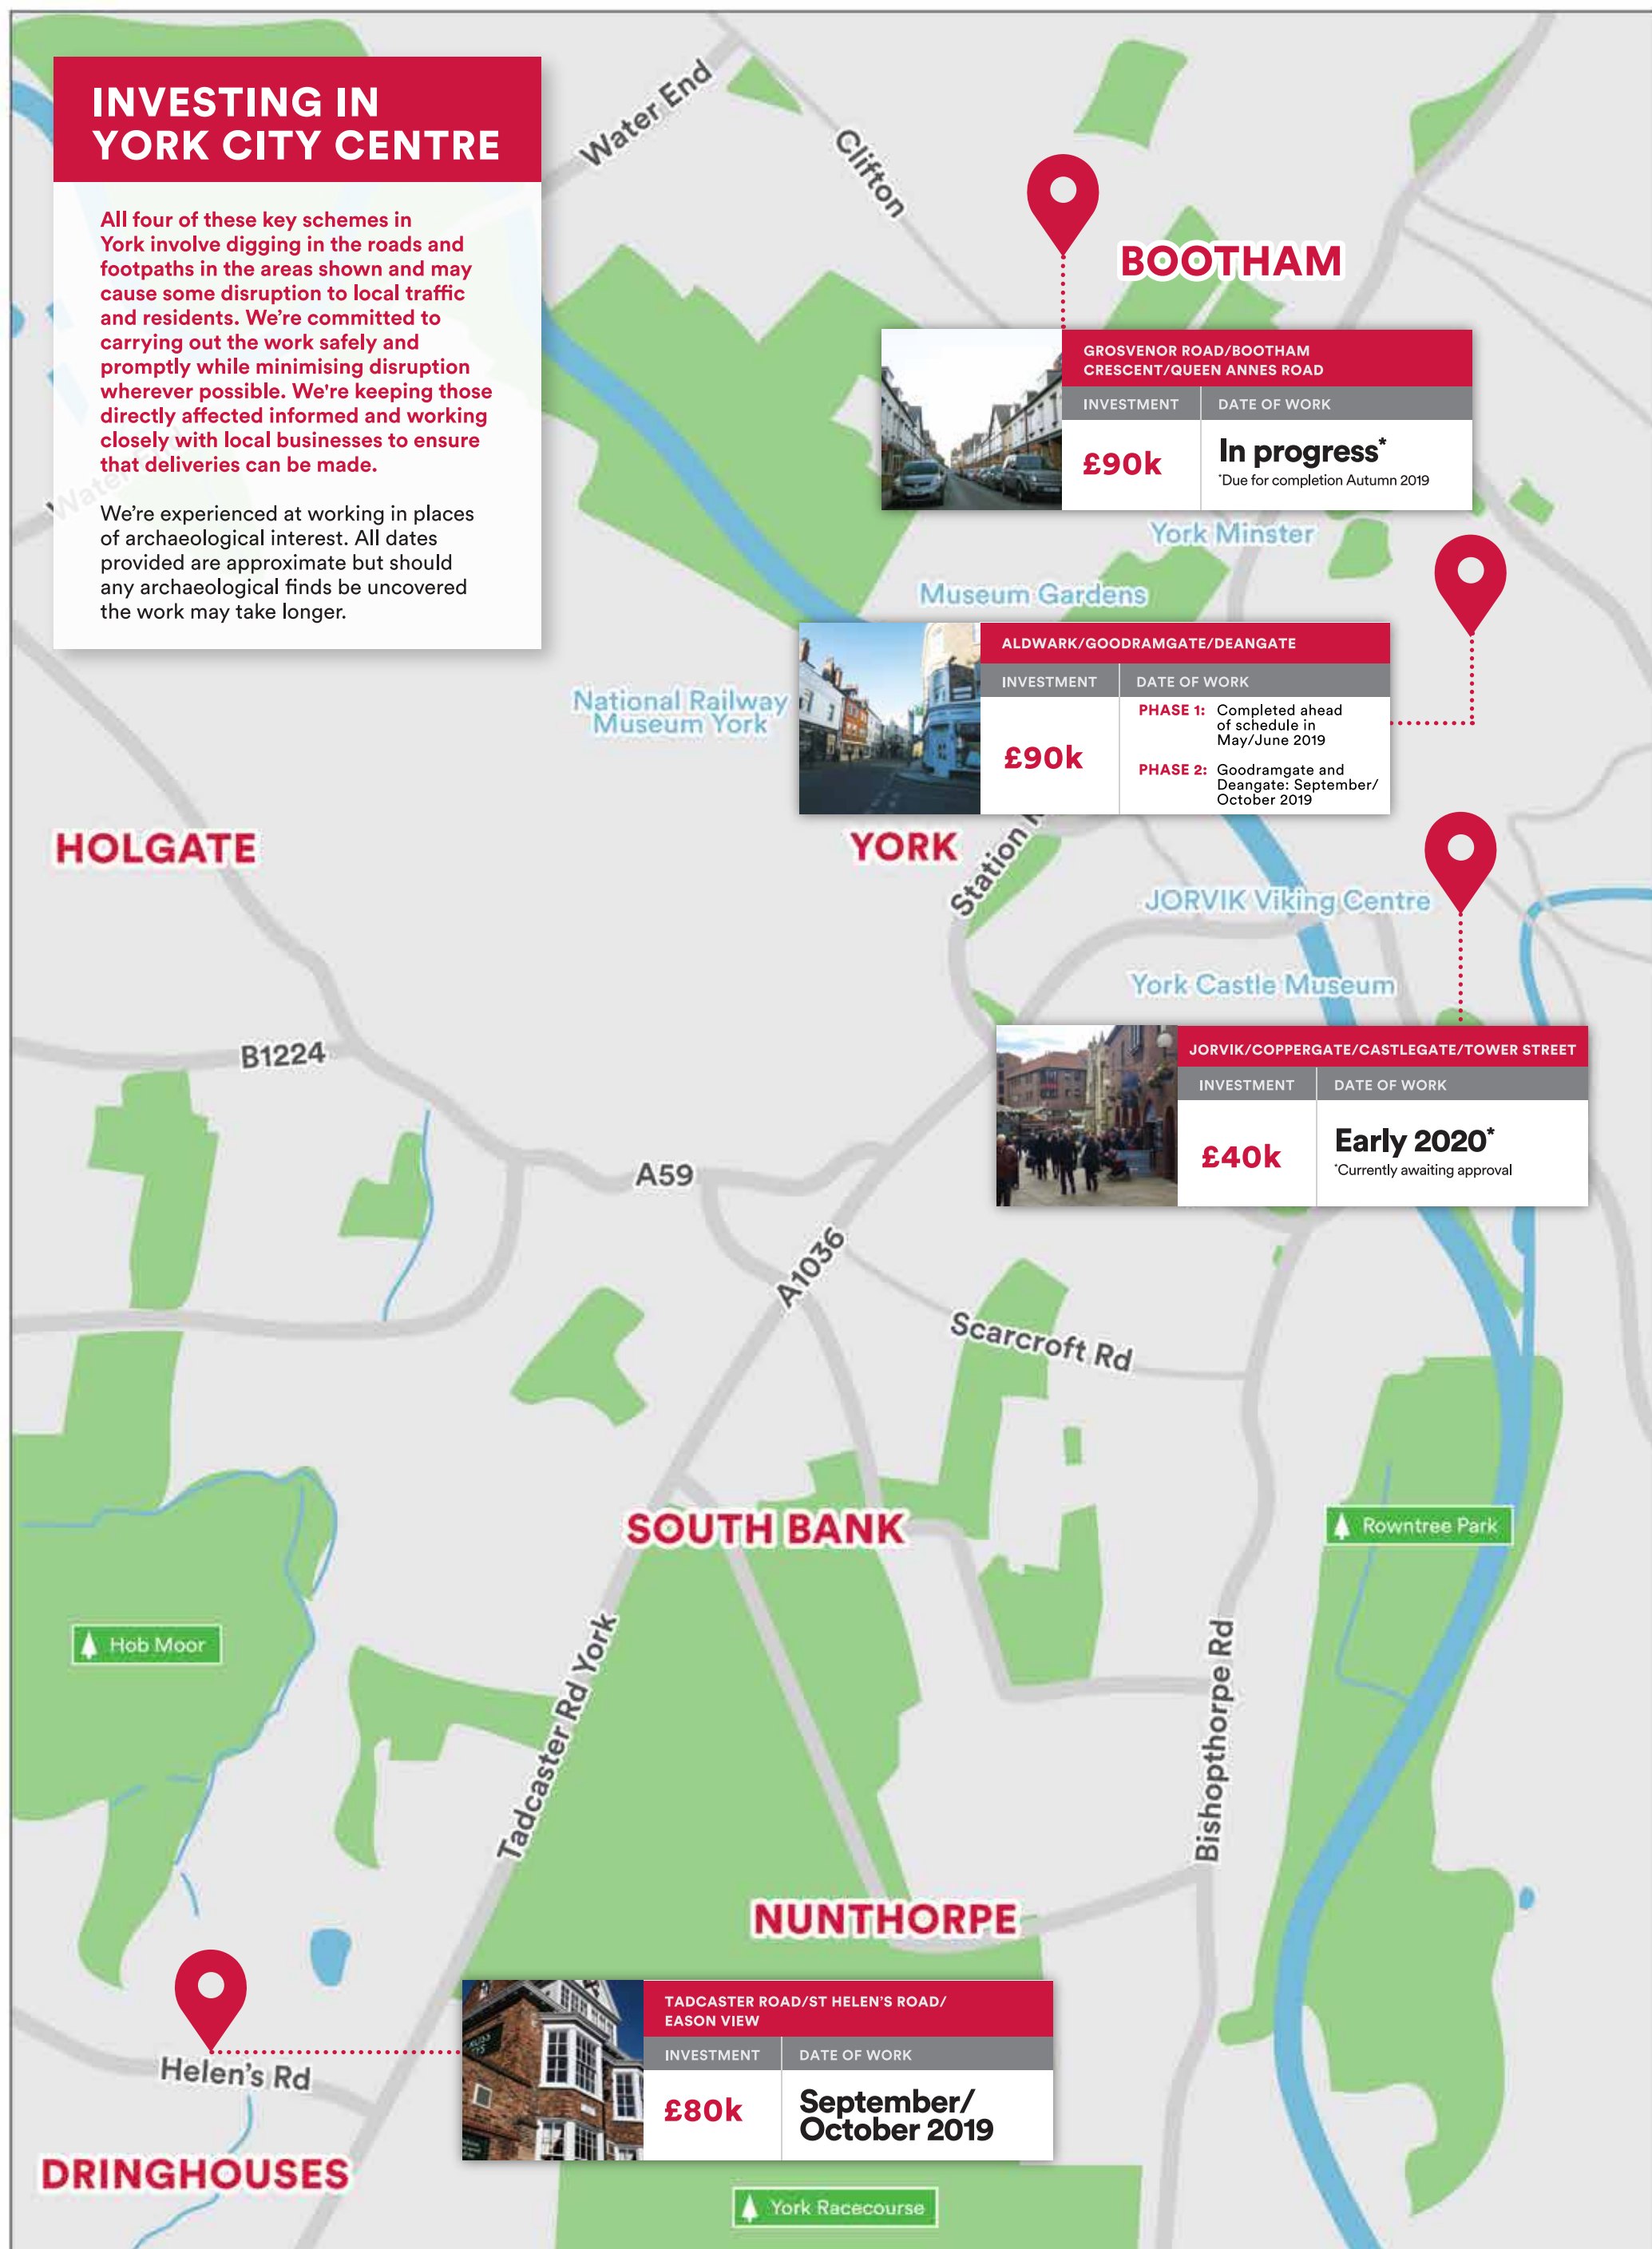

David Linley
Customer Liaison Officer

David is your dedicated Liaison Officer and
is ready to respond to your enquiries about
the work we're doing in York city centre.

INVESTING IN YORK CITY CENTRE

All four of these key schemes in York involve digging in the roads and footpaths in the areas shown and may cause some disruption to local traffic and residents. We're committed to carrying out the work safely and promptly while minimising disruption wherever possible. We're keeping those directly affected informed and working closely with local businesses to ensure that deliveries can be made.

We're experienced at working in places of archaeological interest. All dates provided are approximate but should any archaeological finds be uncovered the work may take longer.
